

ABUKAR ABDIRAHMAN IBRAHIM

Full-Stack Developer

abuukarc.raxman12@gmail.com · +252 619 590 997 · Mogadishu, Somalia · github.com/Abuukar-Abdirahman

PROFILE

Full-stack developer with 3+ years of experience building backend systems and web apps in Laravel, plus mobile apps with Flutter and Firebase. Skilled in REST API design, FilamentPHP admin panels, database design, and third-party payment/telecom integrations. Comfortable owning a project end-to-end — from architecture through deployment — as an in-house engineer, a freelancer, and a contributor to university systems.

TECHNICAL SKILLS

PHP & Laravel · Database Design (MySQL & more) · REST API Design · Admin Panel / Dashboard Development (FilamentPHP & more) · Server Deployment (DigitalOcean, SSH, NGINX) · Telecom / Payment API Integration (Hormuud) · Git & GitHub · Flutter · Firebase & Mixpanel Analytics · Android & iOS App Deployment (Google Play & App Store) · Claude Code (AI-assisted dev) · ...and more

EXPERIENCE

Backend Engineer *Autosom ICT*

- Developed and maintained backend systems using Laravel, MySQL, and REST APIs for company products.
- Collaborated on system design and contributed to ongoing feature development and bug fixes.

Freelance Full-Stack / Backend Developer *Self-employed*

- Delivered Laravel-based backend systems and web applications for multiple independent clients.
- Provided technical support and development assistance to colleagues on their own company projects.

KEY PROJECTS

Daato App *Full-Stack Developer*

- Built Daato, a data-exchange app enabling users to trade mobile data bundles across telecom providers, including Hormuud and Somtel.
- Implemented core logic in Laravel with MySQL and used FilamentPHP for the admin dashboard.
- Integrated the Hormuud API to handle telecom-side transactions and data-bundle operations.
- 150+ apps developed and deployed as part of this platform ecosystem.

Dawrah App *Full-Stack Developer*

- Built a mobile app using Flutter and Firebase for the front end, backed by a Laravel and MySQL system.
- Delivered the full mobile experience end-to-end, from UI to backend API integration.

Ossob Coffee App *Full-Stack Developer*

- Built a mobile app using Flutter and Firebase, connected to a Laravel and MySQL backend.
- Managed product and order data through a FilamentPHP admin panel.

Beder Electronics *Backend Developer*

- Built the Laravel/MySQL backend and REST APIs connecting business logic to the application's front end.

ADDITIONAL PROJECTS

- **Institutional Digital Repository Management System** — Digital repository system built for SIMAD University using Laravel, MySQL, and FilamentPHP.
- **SwiftPharmacy** — Pharmacy management platform built with Laravel, MySQL, and FilamentPHP.
- **HelGuri App** — Real estate mobile app built with Flutter and Firebase, backed by Laravel and MySQL.
- **NGO Projects** — Custom systems built for NGO clients using Laravel and MySQL.

...and many more.
